- What is Autism
- Early signs
- Childs development
- Causes of autism
- ABA and research
- Compic system for language

Jura is a clinical psychologist who has a wealth of experience delivering services to persons with developmental disabilities, and in particular, autism spectrum disorders. A life-long exponent of Applied Behaviour Analysis, she is a pioneer of the approach in Australia, and was also instrumental in introducing ABA for Autism in Indonesia.

ISADD provides a holistic, evidence based service to children, adolescents and adults with Autism Spectrum Disorders and other related disabilities. Advice and support is also provided to families and carers and we regard parents as essential partners in achieving positive change. All interventions are based on behavioural strategies such as Applied Behaviour Analysis and Cognitive Behavioural Therapy which are individualised and tailored to meet needs and are evaluated regularly.
